

Jenna Fothergill - ISRU Project Manager – NASA's Glenn Research Center

Ms. Jenna Fothergill earned her Bachelor's degree in industrial systems engineering from the University of Michigan–Dearborn. After 3 years in the automotive manufacturing industry, she started her career with NASA at The Kennedy Space Center in 2009. Her early years with Kennedy were highlighted by preparing payloads for the International Space Station, overseeing the many activities within the massive Vehicle Assembly Building, and performing hands-on technology development for the On-orbit Servicing, Assembly & Manufacturing (OSAM-1) mission. Jenna then transitioned into a project management role for a diverse portfolio of technology development projects within Kennedy's Swamp Works team. Jenna relocated north and transitioned to The Glenn Research Center in 2023, where she currently manages In-Situ Resource Utilization and other extreme environment projects within the Space Technology Project Office.
