

## **Lauren Ameen**

Lauren Ameen is the Deputy Manager of the Cryogenic Fluid Management Portfolio Project Office at NASA Glenn, which is an agency-wide technology development portfolio. During her tenure at NASA, Lauren has served in numerous roles spanning across both research and engineering, including project and program management, systems engineering on a large NASA flight program, lead fluid systems engineer, and computational fluid dynamics analyst to support astronaut health research. Before joining the Space Technology Project Management Office, Lauren was the Deputy SE&I Lead for the Gateway Power and Propulsion Element, eCryo Project Testing and Validation Lead, and Product Lead Engineer for the SHIVER cryogenic ground test. Lauren holds a MS in Chemical Engineering from Cleveland State University and a BS in Chemical Engineering from The University of Akron.
